

FRONTIER COMMS - DISTRESS BEACON (FREE SAMPLE)

OVERVIEW

The Distress Beacon is a compact, deployable signal unit from the Frontier Comms series. This sample includes Closed and Deployed variants with clean PBR materials, a tidy prefab hierarchy, and 1u = 1m scale. Materials are provided for Built-in, URP, and HDRP pipelines. The pack ships with a one-click Auto Material Assigner to set up materials for your active pipeline.

Use cases (quick ideas)

- Objective marker: place the Deployed prefab to mark extraction points or mission goals.
- Emergency signal event: spawn Closed → switch to Deployed on interact; pulse emissive to guide players.
- Base-building: craftable beacon that boosts comms range or unlocks map pings.
- Exploration breadcrumb: drop beacons to mark caves, wrecks, or POIs; toggle emissive color per state.
- Quest hook: find a unpowered beacon; repair → beacon activates → triggers rescue encounter.

WHAT'S INCLUDED

- Prefabs: Beacon_Closed, Beacon_Deployed
- Meshes (FBX): 2 (closed / deployed)
- Polycount (LOD0): ~7,800 tris (Closed), ~18,500 tris (Deployed)
- LODs: 3 (LOD0 / LOD1 / LOD2)
- Colliders: Child box colliders
- Textures: 2K PBR
- Built-in / URP: AlbedoTransparency, Emission, MetallicSmoothness, Normal
- HDRP: BaseMap, Emissive, MaskMap, Normal
- Pipelines: Materials provided for Built-in, URP, HDRP (example shaders/materials included)
- Scale: 1 unit = 1 meter (real-world proportions)

Compatibility:

- Tested with Unity 2022.3 LTS+
- All render pipelines

GETTING STARTED

1. Import the package. (URP users are ready to go.)
2. For Built-in or HDRP, run the Auto Material Assigner:
Tools → Frontier Comms → Assign Materials → Assign Materials
3. Drop Beacon_Closed or Beacon_Deployed into your scene.
4. Optional: Tweak Emissive intensity to taste.

UPGRADE TO FRONTIER COMMS FULL PACK

Get all matching props in the same design language (transponder, antenna/dish, data pad, portable hub/rack) with the full Frontier Comms pack:
